Chat

In your course you will often communicate with the instructor or other students. One way to communicate is by chat. To chat, click on the chat button. When you click it, you will be taken to the chat list. You can have both general chats (between you and several students) and personal chats (between you and one other person). You will also notice the title of the chat and the description of the chat. On the right side, you will notice how many people are in the chat room. If you would like to view the history of a chat, you can click on the session. You can see the start and end date of the chats as well as the number of chats posted; you will also see all of the information from the chats. You can print the chat if you want, as well.
