Discussions

In your course, you will often have to participate in the discussions. To access the discussions tool in the content area; you will see the discussion. Another way, you can click on the discussion link in navigation bar. You will see all the forms and topics for this course. For example, you will see the course form and the discussion form; to view, click form. When you’re ready to enter discussion, click it. You will see all the messages from all the students. Right now, I’m viewing messages as threaded; so all the messages are indented. So, when I look at these messages, I can see their name, their date, and their message. Also, I can mark the message as unread or read. In addition, if I want to reply to another student’s discussion, I click reply. You can type out your message and also attach items; when you’re done, click close. My reply is here and it’s indented because it’s threaded. You can modify your options by clicking on settings. If you need to refresh your screen you click refresh. Depending on your settings, your message will appear on the top or bottom of the screen.
