In your course, you will be evaluated on your discussions, assignments, and quizzes and presentations. To view your grades, click on the grades link on the navigation bar. When you click grades, you will see all the graded items for your course, the point value, the percentage and the comments the instructor gave you. There is color coding also to show your grade; for example, blue means that you received a 100%; not every course offers this color-coding system. You can also look at the calculations for each graded item. For example, when I look at this area, it says I have not yet received a grade for this item. For this assignment, I received this many points out of 45. Furthermore, if you want to, you can print your grades, too.
